PROJECTS

Baatchit: Real-time Chat Application - [GitHub](#) | [Live Demo](#)

Tech Stack: React, Node.js, Express, MongoDB, Socket.IO, Resend, Tailwind CSS

DECEMBER 2025

- Architected a full-stack messaging platform enabling bi-directional communication with sub-100ms latency using Socket.IO.
- Enforced secure JWT authentication and bcrypt encryption to ensure 100% data privacy for user sessions and message logs.
- Implemented a verification system using Resend and custom domain DNS records to optimize deliverability, verified performance by handling 50+ concurrent sign-ups under stress test conditions.

Mehfil: Full-Stack Music Social Platform - [GitHub](#) | [Live Demo](#)

Tech Stack: Docker, React.js, Node.js, Express.js, MongoDB, Cloudinary, Tailwind CSS, Vite

JUNE 2026

- Built a full-stack music platform with distinct **Artist** and **Listener** roles with authentication and role-based functionality.
- Implemented social engagement features including **follow/unfollow**, song **like/unlike**, personalized playlists, artist discovery, and dynamic user feeds.
- Containerized the entire application using a multi-stage Docker architecture and unified frontend-backend deployment.
- Integrated Cloudinary for scalable data and media management while ensuring reliable cross-platform execution on Linux-based production environments.

AI SkillPath: Intelligent Career Mentor - [GitHub](#) | [Live Demo](#)

Tech Stack: React, Django, PostgreSQL, Mistral AI, Zustand

MARCH 2026

- Built an authenticated career platform featuring automated resume parsing to extract skills, education, and achievements.
- Developed an ATS scoring engine matching resumes to job descriptions with a UI visualizing matched/missing skills.
- Utilized Gemini AI to generate personalized skill roadmaps, month-wise plans, and tailored project recommendations.
- Integrated JSearch API to deliver real-time, targeted job recommendations matching the user's technical profile.
